

Technical Data Sheet

Plastiki Warning Meshes

The Warning Detection Tape is a High-density polyethylene (HDPE) bright and bold tape that provides a visible early warning and identification of a buried service such as an underground utility cables manufactured according to EN12613 & ELOT TP 1501-08-06-08-01:2021. Provides a clear visual warning throughout excavation. There are tapes with or without integrated stainless wire in various widths. With a stainless-steel trace wire running through the tape, it can be detected from the surface using cable avoidance tools. They are produced from 10 cm to 90 cm width based on the specification.

Physical Properties

<u>Dimension</u>	<u>Specification</u>
Mesh Length	As specified
Mesh Width	As specified
Mesh Weight	80-100 g/m ²
Text Tape Width	As specified
Wire Diameter	As specified

Decoration

Warning Tape	Colour as specified
Warning Text	Black (if required)

Warning Message Text

Text as specified

Rolls of 250-500 meters

Packaging

10.000-15.000 meters per pallet
(40-60 rolls of 250 meters per roll)
